

Simplex Strainers (Series 105, 105F, 107, and 115)

Cast simplex strainers are used in applications where the flow can be interrupted for basket cleaning. These strainers are an excellent choice for protection of pumps, meters, valves, traps, spray nozzles, and many more applications.

High Quality Construction

- Flanges designed and built to ANSI, British and JIS specifications
- Material specifications in accordance to ASME and ASTM
- Each strainer is proof pressure tested per ASME standards before shipment

Material Construction for a Variety of Applications

- Available in cast iron, cast and fabricated carbon steel, and 316 stainless steel to meet the demands of a wider range of applications
- ASME Section VIII Division I "U" stamp available for cast steel and cast stainless steel

Low Maintenance Costs

- Quick opening swing bolt reduces the maintenance time
- Few replacement parts are required

Low Installation Costs

- Inline connections

Low Capital Investments

- Competitively priced
- Heavy-duty, large capacity baskets are designed for long life

Large Capacity Baskets

- Provides for a low pressure drop
- Provides for a larger basket open area

Series 124 Fabricated Simplex Basket Strainer

Strainers are used in nearly every industry to protect equipment (valves, pumps, meters, and spray nozzles) and to ensure product purity (gas, petroleum, paper, and food processing). This type of strainer is an inexpensive design that is used in applications where the flow can be interrupted for basket cleaning. This type of strainer is installed in a pipeline to remove unwanted solids from fluids or gases. Straining is accomplished by directing the fluid through a basket where debris is trapped on the inside of a screen element and clean fluid flows through the outlet.

Fluid Engineering simplex basket strainers are available in standard or custom designs. Fabricated designs are not limited to existing patterns or foundry capabilities and are especially superior for corrosive, hazardous, or low specific gravity fluid applications. The Series 124 can be custom designed in many configurations and materials for unusual conditions or critical applications.

Standard Design:

- Fabricated carbon steel body with bolted style cover
- Available in 1/16" or 1/8" perforations and 40 or 80 mesh - 316 stainless steel
- All vessels are manufactured and tested generally in accordance with ASME Code, Section VIII, Division 1, using welders certified to Section IX.
- All strainers are hydrostatically tested to 1.3 times design pressure.

Standard Design Features:

- In line connections
- Compact, light weight fabricated vessels
- Angle basket design with a low pressure drop
- Large capacity basket
- Heavy duty basket design for a long life

Options Available:

- Basket materials of brass, monel, and others
- Mesh lined baskets - 10 x 10 to 500 x 500 mesh
- Numerous materials of construction such as stainless steel, copper nickel, monel, aluminum bronze, and others for corrosive environment
- ASME Section VIII, Code Stamp supplied with complete pressure vessel material traceability
- Vessel design for high pressure and temperature
- Inlet / outlet connections at right angles or offset configuration reduces piping cost.
- Pressure gauge taps - convenient indication of dirty baskets
- Cover lift assembly (davit) facilitates basket removal.
- Special internal and external coatings

Series 124 Fabricated Simplex Basket Strainer 150 Psig Design

1. Basket hold down is available on 10" and larger sizes only.
2. Vent is available on 6" and larger sizes only.
3. Closure, lifting eye is available on 6" and larger sizes only.
4. Drain plug is located on the side for 6" and larger, otherwise it is on the bottom.

Series 124 Fabricated Simplex Basket Strainer

EXAMPLE OF A TYPICAL ORDER SPECIFICATION:

Simplex Strainer shall be size _____ Series 124 with flanged connections as manufactured by Fluid Engineering; Erie, PA.

Strainer body shall be (Fabricated Carbon Steel) with bolted style cover closure. Strainer will be suitable for design pressures of (150) psig at (150°F). Baskets shall be (316 Stainless Steel) with 1/16" or 1/8" perforated openings.

Operating Capacity shall be _____ GPM at _____ psig pressure loss with clean baskets.

Straining Element

- Standard = 0.045" Perf
- Other perf and mesh on application

All units are designed in accordance per ASME Code Section VIII Div I with all welding in accordance with the requirements of ASME Code Section IX and certified.

Model 124E Bolted Closure Simplex Strainer

"Engineered Products for Demanding Applications, Performance, and Service"

SIMPLEX STRAINER WITH BACKWASH CONNECTIONS FABRICATED 224 SERIES

Standard Design:

- Fabricated carbon steel body with bolted style cover
- Available in 1/16" or 1/8" perforations and 40 or 80 mesh – 316 stainless steel
- All vessels are manufactured and tested generally in accordance with ASME Code, Section VIII, Division 1, using welders certified to Section IX.
- All strainers are hydrostatically tested to 1 ½ times design pressure.
- 3" through 24" sizes

Standard Design Features:

- In line connections
- Compact, light weight fabricated vessels
- Angle basket design with a low pressure drop
- Large capacity basket
- Heavy duty basket design for a long life

Options Available:

- Basket materials of brass, monel, and others
- Mesh lined baskets – 20 x 20 to 400 x 400 mesh
- Numerous materials of construction such as stainless steel, copper nickel, monel, aluminum bronze, and others for corrosive environment
- ASME Section VIII, Code Stamp supplied with complete pressure vessel material traceability
- Vessel design for high pressure and temperature
- Inlet/outlet connections at right angles or offset configuration reduces piping cost.
- Pressure gauge taps – convenient indication of dirty baskets
- Cover lift assembly (davit) facilitates basket removal.
- Special internal and external coatings
- Legs, foot ring, or base available upon request.

SERIES 134 FABRICATED SIMPLEX BASKET STRAINER OFF-SET DESIGN BOLTED COVER

MAXIMUM OPERATING PRESSURE AND TEMPERATURE

2" through 24" - 150 psi @ 150°F
(Available in full ANSI Ratings)

STANDARD DESIGN

- Fabricated carbon steel with bolted style cover
- 304 stainless steel basket with perforated (1/32", 1/16", 1/8", or 5/32") openings
- All vessels are manufactured and tested generally in accordance with ASME Code, Section VIII, Division 1, using welders certified to Section IX.
- All strainers are hydrostatically tested to 1 ½ times design pressure.

STANDARD DESIGN FEATURES

- Compact, light weight fabricated vessels
- Flat basket design with a low pressure drop
- Extra-large capacity basket
- Heavy duty basket design for a long life

OPTIONS AVAILABLE

- Basket materials of 316 stainless steel, brass, monel, and others
- Mesh lined baskets - 20 x 20 mesh to 200 x 200 mesh
- Numerous materials of construction such as stainless steel, bronze, copper nickel, monel, and others for corrosive environments.
- ASME Section VIII, Code Stamp supplied with complete pressure vessel material traceability.
- Vessel design for high pressure and temperature
- Pressure gauge taps - convenient indication for dirty basket. Differential Pressure accessories also available.
- Cover lift assembly (davit) facilitates basket removal. Swing closure and swing bolt closure designs also available.
- Special internal and external coatings

1. Basket hold down is available on 10" and larger sizes only.
2. Vent is available on 6" and larger sizes only.
3. Closure, lifting eye is available on 6" and larger sizes only.

Model 300 Simplex Strainer

Start-up strainers, like tee and cone strainers, are typically designed with very little debris holding capacity. They will have a higher differential pressure than a basket strainer. Cleaning these are also a major issue. Cone strainers have a pipe spool to remove. When removing the basket in a tee strainer, the debris has a tendency to fall out of the basket into the bottom of the strainer housing. Sometimes the debris passes downstream and causes damage to the device that is being protected. FE has a research project to redesign a basket that will hold the debris.

The main application for a “Y” strainer is gas and steam where cleaning is infrequent. “Y” strainers must be installed with a basket hanging so that the blow-off valve is near the ground. The screen in a “Y” strainer is removed from the bottom of the strainer. This is not a major problem with small “Y” strainers (under 6”, (152.4 mm)). However, on larger strainers the cover can weigh over 100 pounds (45 kg) and are not easily removed. Lastly, the open area ratio on most “Y” strainers is less than 2 to 1, therefore there is no debris holding capacity.

The major problem with a simplex strainer is that the system needs to be shut down in order to clean the basket. Therefore, simplex strainers piped in a duplex arrangement have become a preferred style. Simplex and duplex strainers are more attractive because they are installed in an upright position and the basket is lifted from the top. When the basket is filled with debris, it may be heavy and can only be removed in the vertical position. Simplex and duplex strainers can only be installed in a horizontal pipeline.

None of the designs mentioned above can be used in a vertical pipe run. Over the last six months, Fluid Engineering has been reviewing the problems found in vertical piping. Vertical piping arrangements are mostly found in petrochemical and chemical processing systems. As of April 2003, Fluid Engineering started offering a new type of simplex strainer with a tubular type basket design. The 300 series strainer (Models 300, 301, 302, and 303) are designed for various installation positions such as: vertical-up, vertical-down, or as an elbow. See the above photo showing the easy cleaning of the 300 series.

The Model 300VD through 303 VD (designed for vertical-down) is a design where the flow is from outside the of the perforated basket with a manual blow down. The flow, as it washes over the basket, will force the debris to the bottom of the strainer housing, which has a built in sump. This flow patter has been designed to act as a self-washing (self-cleaning) simplex strainer.

Adding straightening vanes (SV) to any of the Models 300VD (also Models 301-303) creates a flow diffuser. This diffuser can eliminate up to 95 percent of the normal turbulence found after any elbow in a piping system. The turbulence will shorten the normal operating life of valves (mainly check valves), pumps, and flow measuring equipment. Using a Model 300 strainer in place of an elbow will eliminate 100 percent of elbow erosion. Erosion is the cause of most pipeline failures. This lessons downtime and repair costs

"ENGINEERED PRODUCTS FOR DEMANDING APPLICATIONS, PERFORMANCE, AND SERVICE"

Series 600 "S" Basket Strainers

The Series 600 "S" are simplex strainers. They are pressure vessels installed in a pipeline to remove unwanted solids from fluids. The Series 600 "S" are used in applications where flow can be interrupted for basket cleaning (duplex arrangements are available upon request).

The Series 600 "S" are designed with **.4 to .5 cu. ft. debris holding capacity** that allows for a longer run time. Along with a large holding capacity, they can also be used for very fine filtration by including a mesh liner. The incorporation of the swing bolt closure eliminates the use of any tools and also eliminates the need for nuts and bolts as in other designs in the market place.

Series Designations	
602S	8" - 30, Offset Nozzles, Outlet Near Top
603S	6" - 30, Offset Nozzles, Outlet Near Top
603SM	Miniature 6" - 30, Offset Nozzles, Outlet Near Top
604S	8" - 30, 2 pc/4 Leg Assembly, Outlet Near Middle
605S	8" - 30, 2 pc/4 Leg Assembly, Outlet Near Bottom

STANDARD FEATURES:

- Offset Connections
- Swing Bolt Closure
- Standard Housing
- Materials are carbon steel, 304 stainless steel, or 316 stainless steel
- Inlet/Outlet Connections are ANSI Flanges or NPT
- Vent and Drain Connections are NPT
- Two 1/4" NPT Instrument Connections
- Viton Seals
- Straining Basket: 3/32", 3/16", & 1/8" perforations, 304 or 316 stainless steel (Other perforations available upon request)
- Design Working Pressure: 150 psig
- Design Working Temperature: 250°F
- Designed, manufactured, and tested generally in accordance with ASME Section VIII, Division 1 with welders qualified to Section IX

OPTIONS:

- ANSI flanges for vent and drain connections
- Baskets are available in other materials, perforations, and meshes
- Other design pressures and temperatures are available upon request
- U-Stamp

SIMPLEX BASKET STRAINER ♦ RF FLANGED & THREADED

ANSI CLASS 150/300 ♦ CARBON AND STAINLESS STEEL

MODELS: 114 CS

(CARBON STEEL - THREADED - 150/300)

124 CS

(CARBON STEEL - RF FLANGED - 150)

114 SS

(STAINLESS STEEL - THREADED - 150/300)

124 SS

(STAINLESS STEEL - RF FLANGED - 150)

SIZE RANGE:

THREADED: 3/8" ~ 3"

FLANGED: 1" ~ 8"

FEATURES

♦ HIGH QUALITY CONSTRUCTION

THE SERIES 114/124 BASKET STRAINER IS AVAILABLE IN CARBON OR STAINLESS STEEL WITH EITHER THREADED OR FLANGED (RF) END CONNECTIONS. IT FEATURES A MACHINED GROOVE THAT ENCAPSULATES THE COVER GASKET AND AIDS IN PREVENTING GASKET BLOW-OUTS.

♦ MINIMAL PRESSURE LOSS

PRESSURE LOSS IS MINIMIZED BY PROVIDING AN OVER-THE-TOP FLOW PATH AND LARGE STRAINING AREA. THE STRAINING CAPACITY IS A MINIMUM OF SIX TIMES THAT OF THE CROSS SECTIONAL AREA OF THE CONNECTING PIPE.

♦ LARGE STRAINING CAPACITY

WITH ITS LARGE BODY AND SIZEABLE STRAINING ELEMENT, THE SERIES 114/124 BASKET STRAINER CAN STORE LARGE AMOUNTS OF DEBRIS - THUS MAXIMIZING TIME BETWEEN SERVICING. IT ALSO FEATURES A MACHINED SEAT WITH O-RING THAT ENABLES FINE FILTRATIONS - DOWN TO 40 MICRONS.

♦ NUMEROUS STRAINING ELEMENT OPTIONS

STRAINING ELEMENTS ARE AVAILABLE IN A VARIETY OF PERFORATIONS, MESHES, AND MATERIALS. SPECIAL DESIGNS ARE ALSO AVAILABLE INCLUDING MAGNETIC, WEDGE WIRE, DRILLED PERFORATIONS, AND PLEATED STRAINING ELEMENTS. THE STANDARD MATERIAL FOR STRAINING ELEMENTS IS TYPE 304 STAINLESS STEEL.

♦ SELF-CLEANING OPTION

UTILIZING A MODIFIED STRAINING ELEMENT, THE BOTTOM DRAIN CAN BE FITTED WITH A TITAN FCI BALL VALVE TO ALLOW FOR THE AUTOMATIC CLEANING OR FLUSHING OF THE STRAINING ELEMENT WHILE KEEPING THE PIPELINE IN SERVICE.

Patent-Pending Design

APPLICATIONS

MARKETS: WATER & WASTEWATER, PULP & PAPER, CHEMICAL & PETROCHEMICAL, PETROLEUM, OIL & GAS, TRANSPORTATION, MARINE INDUSTRY, AND FOOD INDUSTRY

GENERAL APPLICATION: SIMPLEX BASKET STRAINERS ARE INSTALLED INTO A PIPELINE SYSTEM TO REMOVE UNWANTED DEBRIS FROM THE PIPELINE FLOW. BASKET STRAINERS ARE COMMONLY USED IN HORIZONTAL PIPELINES WHERE DEBRIS LOADING IS HIGH AND THE COLLECTION OF SOLIDS IS REQUIRED. STRAINING IS ACCOMPLISHED VIA A PERFORATED OR MESH LINED STRAINING ELEMENT, INTERNAL TO THE BASKET STRAINER. IN GENERAL, THE SIZE OF THE PERFORATION OR MESH SHOULD BE SLIGHTLY SMALLER THAN THE SMALLEST DEBRIS PARTICLE TO BE REMOVED. IT IS IMPORTANT TO NOTE THAT THE CORRECT SIZE OF A BASKET STRAINER IS DETERMINED BY ITS JOB FUNCTION, NOT BY THE SIZE OF THE PIPELINE.

The above data represents common market and service applications. No representation or guarantee, expressed or implied, is given due to the numerous variations of concentrations, temperatures and flow conditions that may occur during actual service.

PRESSURE - TEMPERATURE RATINGS

REFERENCED STANDARDS & CODES

Code	Description	Code	Description
ASME/ANSI B16.5	Pipe Flanges and Flanged Fittings	ASME/ANSI B16.11	Forged Steel Fittings, Socket-Welding and Threaded

PRESSURE - TEMPERATURE RATING ⁽¹⁾

ANSI CLASS 150	A216 Gr. WCB ⁽²⁾	A351 Gr. CF8M ⁽²⁾
WOG (Non-shock)	285 PSI @ 100 °F	275 PSI @ 100 °F
Saturated Steam	150 PSI @ 366 °F	150 PSI @ 366 °F
Max Liquid	80 PSI @ 800 °F	20 PSI @ 1000 °F
ANSI CLASS 300	A216 Gr. WCB ⁽²⁾	A351 Gr. CF8M ⁽²⁾
WOG (Non-shock)	740 PSI @ 100 °F	720 PSI @ 100 °F
Saturated Steam	300 PSI @ 420 °F	300 PSI @ 420 °F
Max Liquid	400 PSI @ 800 °F	350 PSI @ 1000 °F

- Threaded units are dual rated ANSI Class 150/300. Flanged units are rated at ANSI Class 150.
- Pressure and Temperature ratings are considerably lower for units installed with the optional quick-opening covers. Please consult factory for further information.

STANDARD STRAINING ELEMENTS

Size	Liquid	Open Area	Steam	Open Area
3/8" ~ 2"	1/16 (.0625)	41%	1/32 (.033)	28%
2 1/2" ~ 8"	1/16 (.0625)	41%	3/64 (.045)	36%

Fluid Engineering makes every effort to ensure the information presented on our literature accurately reflects exact product specifications. However, as product changes occur, there may be short-term differences between actual product specifications and the information contained within our literature. FE reserves the right to make design and specification changes to improve our products without prior notification. When required, request certified drawings.

SIMPLEX BASKET STRAINER ♦ FLANGED ENDS

ANSI CLASS 300 ♦ CARBON AND STAINLESS STEEL

MODELS: 124 CS
(CARBON STEEL)

124 SS
(STAINLESS STEEL)

SIZES: 2" ~ 12"

FEATURES

- ♦ **RUGGED, HIGH QUALITY CONSTRUCTION**
THE MODEL 124 CS/SS IS A HEAVY DUTY BASKET STRAINER DESIGNED WITH EXCEPTIONAL WALL THICKNESS. IT IS AVAILABLE IN BOTH CARBON STEEL AND STAINLESS STEEL. IT IS A LOGICAL CHOICE FOR SERVICE APPLICATIONS THAT HAVE HIGHER TEMPERATURE AND PRESSURE REQUIREMENTS.
- ♦ **MINIMAL PRESSURE LOSS**
PRESSURE LOSS IS MINIMIZED BY PROVIDING A SLANTED STRAINING ELEMENT DESIGN AND STRAIGHT FLOW PATH. PLUGGED, NPT TAPS ARE PROVIDED (NEAR THE INLET AND OUTLET ON BOTH SIDES) ALLOWING FOR THE QUICK MOUNTING OF PRESSURE GAUGES TO MONITOR PRESSURE LOSS.
- ♦ **LARGE STRAINING CAPACITY**
WITH ITS LARGE BODY AND SIZEABLE STRAINING ELEMENT, THE 124 CS/SS HAS THE ABILITY TO STORE LARGE QUANTITIES OF DEBRIS WITHOUT AFFECTING PRESSURE LOSS - THUS MAXIMIZING TIME BETWEEN SERVICING.
- ♦ **NUMEROUS STRAINING ELEMENT OPTIONS**
STRAINING ELEMENTS ARE AVAILABLE IN A VARIETY OF PERFORATIONS, MESHES, AND MATERIALS. SPECIAL DESIGNS ARE ALSO AVAILABLE INCLUDING MAGNETIC, WEDGE WIRE, DRILLED PERFORATIONS, AND PLEATED STRAINING ELEMENTS. THE STANDARD MATERIAL FOR STRAINING ELEMENTS IS TYPE 304 STAINLESS STEEL.
- ♦ **SELF-CLEANING OPTION**
UTILIZING A MODIFIED STRAINING ELEMENT, THE BOTTOM DRAIN CAN BE FITTED WITH A FLUID ENGINEERING BALL VALVE TO ALLOW FOR THE AUTOMATIC CLEANING OR FLUSHING OF THE STRAINING ELEMENT WHILE KEEPING THE PIPELINE IN SERVICE.

TECHNICAL

PRESSURE/TEMPERATURE RATING CS - ASTM A216 GR. WCB - CLASS 300

WOG (Non-shock): 740 PSI @ 100 °F
Saturated Steam: 300 PSI @ 420 °F
Maximum Liquid: 400 PSI @ 800 °F

PRESSURE/TEMPERATURE RATING SS - ASTM A351 GR. CF8M - CLASS 300

WOG (Non-shock): 720 PSI @ 100 °F
Saturated Steam: 300 PSI @ 420 °F
Maximum Liquid: 350 PSI @ 1000 °F

- Carbon Steel not recommended for prolonged use above 800 °F.
- Stainless Steel not recommended for prolonged use above 1000 °F.

APPLICATIONS

MARKETS: WATER & WASTEWATER, PULP & PAPER, CHEMICAL & PETROCHEMICAL, PETROLEUM, OIL & GAS, TRANSPORTATION, MARINE INDUSTRY, AND FOOD INDUSTRY

GENERAL APPLICATION: SIMPLEX BASKET STRAINERS ARE INSTALLED INTO A PIPELINE SYSTEM TO REMOVE UNWANTED DEBRIS FROM THE PIPELINE FLOW. BASKET STRAINERS ARE COMMONLY USED IN HORIZONTAL PIPELINES WHERE DEBRIS LOADING IS HIGH AND THE COLLECTION OF SOLIDS IS REQUIRED. STRAINING IS ACCOMPLISHED VIA A PERFORATED OR MESH LINED STRAINING ELEMENT, INTERNAL TO THE BASKET STRAINER. IN GENERAL, THE SIZE OF THE PERFORATION OR MESH SHOULD BE SLIGHTLY SMALLER THAN THE SMALLEST DEBRIS PARTICLE TO BE REMOVED. IT IS IMPORTANT TO NOTE THAT THE CORRECT SIZE OF A BASKET STRAINER IS DETERMINED BY ITS JOB FUNCTION, NOT BY THE SIZE OF THE PIPELINE.

The above data represents common market and service applications. No representation or guarantee, expressed or implied, is given due to the numerous variations of concentrations, temperatures and flow conditions that may occur during actual service.

BILL OF MATERIALS ⁽¹⁾

No.	PART	124 CS ⁽²⁾	124 SS
1	Body	Carbon Steel A216 Gr.WCB	Stainless Steel A351 Gr. CF8M
2	Cover	Carbon Steel A216 Gr.WCB	Stainless Steel A351 Gr. CF8M
3	Cover Gasket ^{(3) (4)}	Spiral Wound Stainless Steel Non-Asbestos	
4	Straining ⁽³⁾ Element	Type 304 Stainless Steel (Other materials are available)	
5	Stud	Alloy Steel A193-B7	Stainless Steel 18-8 Series 300
6	Nut	Carbon Steel A194-2H	Stainless Steel 18-8 Series 300
7	Plug	Carbon Steel	Stainless Steel

- Equivalent or better materials may be substituted at the manufacturer's discretion.
- Carbon Steel bodies are epoxy painted.
- Denotes recommended spare parts.
- Gasket is for bolted cover. For special cover designs, different gasket may be used.

Body Material Application Notes:

- Carbon Steel** performs exceptionally well in high temperatures, up to 800 °F in continuous service. It provides high resistance to shock, vibration, piping strains, and fire and freezing hazards. Carbon Steel strainers are often used in the oil and petrochemical industries.
- Stainless Steel** is highly corrosion resistant, extremely strong, and is commonly specified for high temperature service, up to 1000 °F in continuous service. Stainless Steel strainers are commonly found in the chemical, food, and pharmaceutical industries.

- Dimensions, weights, and flow coefficients are provided for reference only. When required, always request certified drawings.
- Face to face values have a tolerance of ± 0.06 in (± 2.0 mm) for sizes 10" and lower and a tolerance of ± 0.12 in (± 3.0 mm) for sizes 12" and larger.

PRESSURE - TEMPERATURE RATINGS

Additional Design & Technical Notes:

- Cover vent provided on all sizes. Cover vent is 1/4" NPT on all sizes and is furnished with plug.
- Bottom drain is furnished with plug. See table to the left for sizes
- 1/4" NPT gauge taps are provided on all sizes and are furnished with plugs.
- Adjustable/Removable Support legs are provided on sizes 4" and larger.
- Optional cover designs are available - C/F.
- Steam jacketed designs are available - C/F.
- Epoxy coating is available - C/F.
- Designed for horizontal pipelines only.
- Standard material for straining elements is Type 304 Stainless Steel. Other materials are available upon request.
